

“Marine Biotechnology” 誌に論文を投稿する皆様へー引用論文のガイドラインー

論文作成の際は以下の点にご注意ください。

- Any statement in the manuscript that relies on external sources of information — that is, apart from the authors' own new ideas and findings, or general knowledge — should include a citation to those sources of information. (自己のオリジナルアイデア以外のものには正確な引用を)
- Authors should avoid citing derivations of original works — they should cite the original work rather than a review article that cites an original work. (総説よりは原著論文の引用を)
- Authors should ensure that their citations are accurate. If a cited paper does not support a claim being made, this should be made unambiguously clear, and should not be cited in a way that implies support or in any other way misrepresents the work. (いわゆる孫引きには要注意)
- Authors should not cite sources that they have not read. (自分で読んだことのない論文の引用は不可)
- Authors should not preferentially cite their own or their friend' s, peer' s, or institution's publications. (自己の論文や友達、所属機関報からの引用を優先させない)
- Authors should avoid citing work solely from one country. (一国からの引用に偏ることには注意)
- Authors should not use an excessive number of citations to support one point. (或る一事項に関しての引用は多すぎないように注意)
- Ideally, authors should cite sources that have undergone peer review where possible. (できれば査読誌からの引用を)
- Authors should not cite advertisements or advertorial material. (商業広告などからの引用は避ける)

These guidelines can also be found on the Springer editorial policy pages:
